Privacy Information MYLAPS EventKit

URL

eventkit.mylaps.com

General description

On this webpage, you can subscribe to several events, and you can find the results of these events. Your personal data will only be used to create event results that you subscribed to. Your individual results are compiled from your subscription information and time registrations during the event. These individual results then form the complete event results. The results contain: name, bib number, position in the race, distance, time, and gender. Results are published by the event organizers. The organizers use this webpage to publish results and to inform competitors about their results.

Data usage and distribution

MYLAPS will not use your personal data for purposes other than to subscribe for an event or to create an event result. MYLAPS does not actively distribute your data. It is possible that the event (results) data is anonymously used for statistics.

Contact

In case you have any questions about your subscription or the results on this webpage, MYLAPS kindly requests you to contact the event organizer of the event that you joined.

Need more info? Please check our general [Privacy Policy](). In case of doubt, you can also send an email to privacy@mylaps.com.
