

The Start Button is an easy to use add-on for your BibTag system. The button creates a gunshot start in your Timing & Scoring software to mark the start of your race. Simply plug the cable into your BibTag case and you are good to go.

START BUTTON

Start all your
BibTag cases with
one click

Start a race with up to four BibTag cases simultaneously with the MYLAPS Start Button!

- One click accurately starts multiple BibTag cases
- A single person can start all systems at the same time
- Works with all possible setups

When more than one BibTag case is used at the start, additional splitters can be used to connect the start button to up to four BibTag cases.

To start multiple BibTag cases on a wide starting line, we offer an additional 20 meter long cable for the start button.
